Step 1: Remove UrNCollect Funnel from pouch.

Step 2: Remove UrNCollect Tube from box.

Step 3: Place UrNCollect Tube upright on a flat surface.

Step 4: Unscrew the cap from the UrNCollect Tube containing specimen preservative. (Do not throw away the cap, this will be used in Step 10).

Step 5: While holding the UrNCollect funnel upright, screw on the UrNCollect Tube ensuring that it is firmly attached.

Step 6: Instruct the patient to point the spout of the device towards the toilet or urinal and begin urinating into UrNCollect Funnel.

Step 7: Instruct the patient to continue urinating until the bladder is completely emptied.

Step 8: Unscrew UrNCollect Tube from funnel. Gently tap floater against the inside of the UrNCollect Tube to dislodge excess specimen. Instruct the patient to not set the apparatus down because contents may spill.

Step 9: Dispose of the UrNCollect funnel. (Do not dispose into toilet/urinal).

Step 10: Firmly screw the cap onto the UrNCollect Tube.

Step 11: Place UrNCollect Tube onto flat surface.

Step 12: Place (1) barcode label on UrNCollect Tube.

Step 13: Place (1) barcode label on Test Requisition Form.
